

TIRAR

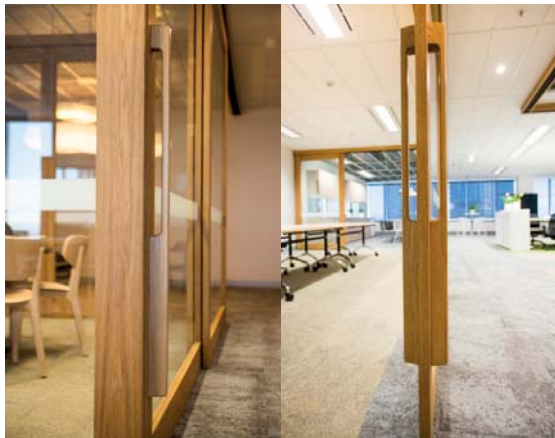

TIRAR is a range of elegant, simple and uncompromisingly contemporary solid timber door furniture that is defined by its appeal to the senses.

AMERICAN WALNUT UNIVERSAL LEVER

TIRAR

It's one thing to be the humble observer of beauty.
It's quite another to reach out and touch it.
TIRAR feels luxuriously smooth in the hand and invokes a reassuring honesty like only natural materials can.
The range is unique in its consideration of function, form and tactile delight, crafted to bring subtle warmth to a building in both a visual and sensory way.

TECHNICAL SPECIFICATIONS

TIRAR is designed and manufactured in Australia from Australian and international timbers. TIRAR door furniture and accessories come in 5 standard timber finishes. At TIRAR we offer our clients the option to select a custom timber to match their project. TIRAR timber is carefully selected and sourced from FSC certified timber suppliers.

TIRAR offers a range of pull handles, lever handles, universal design lever handles and towel rails. TIRAR can be crafted to suit individual project needs.

Each TIRAR piece is sealed in marine grade sealer and finished in marine grade clear top coat satin finish.

Product comments: If exposed to salt, sun and wet conditions timber can change over time. While TIRAR products are sealed with marine grade sealers, natural changes are inherent and part of the character of natural timber.
