

Sub Frame

innovative solution for the perfect door system

Quick & simple to install. M&B SubFrame is "bricked in" to ensure opening is true & square to fit final frames and doors.

Once brick work is dry, timber braces can be removed [sawn] to allow for easy access.

Provides an accurate straight edge for the plasterer to return render to.

M&B SubFrame is an inexpensive solution to a potentially costly problem.

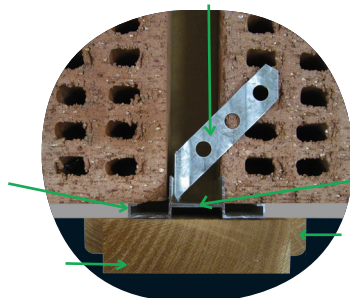

Minimise the risk of damage to your timber door frames during construction. An M&B Sub Frame will ensure the frame opening is true and square, designed to trim fit final frames and doors.

Timber joinery doors and frames have increased in popularity in Western Australia over the past few years. M&B has recognised this trend and the need for WA builders to protect "High Value" premium doors and frames. The M&B Sub Frame offers a "Hassle Free" solution.

By using an M&B SubFrame you will avoid exposing the Door Frame to "on site" damage during the construction process. Plus installation of frames, doors & hardware can now be completed at the same time prior to handover.

Installing an M&B SubFrame offers the following benefits:

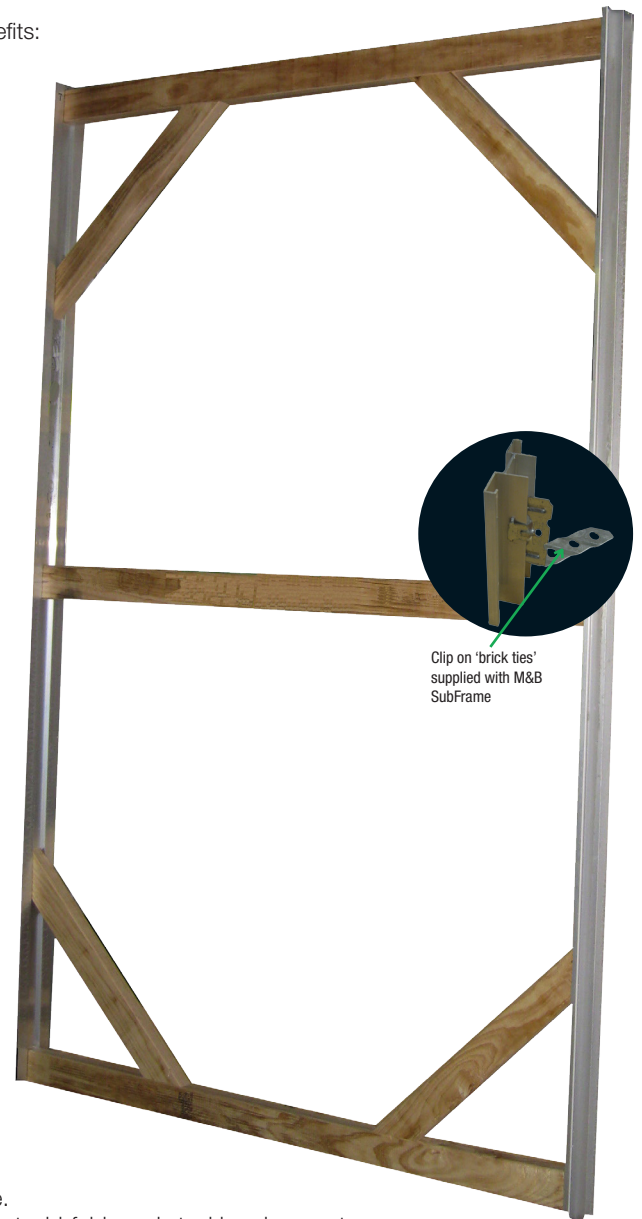

- ✓ M&B SubFrame is **bricked in** so you are left with a clean, flush opening.
- ✓ Quick & simple to install.
- ✓ Minimises the risk of site damage to door frames during construction.
- ✓ Joinery frames will not be exposed to weathering during construction.
- ✓ Minimise the risk of potential site theft [frames].
- ✓ Provides an **accurate straight edge** for the plasterer to return plaster/render to.
- ✓ Allows for quick and timely lock up.
- ✓ Installing a SubFrame will ensure a perfect operational door system.
- ✓ Can be used for all external door systems – bi-fold, stacking, pivot & swing doors.
- ✓ Suitable for render or face brick finish.
- ✓ M&B SubFrame is an inexpensive solution to a potentially costly problem.

aluminium subframe + temporary pine braces
+ clip on aluminium brick ties

SubFrames are manufactured to required opening size. Larger sizes are available to suit special size doors, pivots, bi-folds and stacking door systems.

M&B can professionally install FRAMES, DOORS & HARDWARE in to your sub-frame opening.

Clip on 'brick ties'
supplied with M&B
