

WOCA EXTERIOR OIL SYSTEM FOR TIMBER

PRODUCT DESCRIPTION

WOCA Exterior Oil systems are based on environmental friendly products. Vegetable oil components, water, hardener, UV-absorber, water repellent substances and fungicides combine to produce optimal results on any timbers, enabling easy and simple maintenance. The system is based on WOCA Primer and WOCA Exterior Oil. The oil impregnates the wood structure and protects the surface from within, producing a strong and water resistant finish.

WOCA's philosophy is that wood in itself is a unique and a natural material, which possesses a number of natural inner properties needed to ensure long lasting durability. These qualities/properties *only* need to be strengthened and stimulated, so the wood stays in the same condition as the day it was installed. Suitable for Accoya, Jarrah, Merbau, Spotted Gum, Kapur, Dark Red Meranti, and many other species, WOCA provides an excellent solution to any exterior wood applications.

COVERAGE

Exterior Oil - Exclusive for outdoor use and basic treatment and maintenance of timber surfaces such as decks, cladding, garden furniture etc. Rule of thumb for most timbers is: 1st coat 10m² per 1ltr, 2nd coat 15m² per 1ltr.

Coverage per Tin	750mm	2.5 litre	10 litre	20 litre
1st Coat	10m ²	10m ²	10m ²	10m ²
2nd Coat	15m ²	15m ²	15m ²	15m ²

Woca is not expensive when you compare the coverage it can achieve.

Extremely good quality water based timber oil that is real value for money.

Woca oils with darker pigments/colours are better protector of timber than clear finishes. The darker colours are like a sunscreen. When possible sell benefit of colours.

Merbau – looks great with Woca Bankirai

Jarrah – looks great with Woca Walnut or Woca Black.

Clear/prime – all colours can be put over the primer/clear coat.

eDeck & eClad – sold with clear primer which can then have any Woca colours put over the top for final coat.

Accoya – sold with clear primer.

VACUUM COATER

Sell the benefits of the vacuum coater. Fully seals boards on all four edges. Very cost effective.

M&B can add top coat colour before sending to site. Final coat to be applied on site after installation. (Primer + 1 top coat through Vacuum Coater then 1 top coat on site after installation.) This results in timber having 3 coats of oil which is fantastic way to treat/preserve external timbers when first installed.

Woca Oil has a shelf life of three years in the tin. Any unused oil can be used for future annual maintenance/coats. Reapply when timber looks like it needs coating. Very easy to reapply. No sanding required.

REMEMBER – always reseal cut ends with end sealer/primer.

PRODUCT PROPERTIES

- Based on renewable vegetable oils
- Built in UV Filter
- Fast drying
- Easy to apply
- Penetrating / None Film building

COMPETITIVE ADVANTAGES

- Environmentally friendly formula
- Sustainable and renewable raw material
- Doesn't flake off

VALUE TO THE CLIENT

- Durable and long lasting results
- Easy & effective maintenance
- Healthy environment
- No sanding between treatments required

M&B are WA distributor for WOCA. You CANNOT buy Woca in Bunnings!

CLEANING AND MAINTENANCE

Depending on the wear and tear, the required surface maintenance may vary. In general, it is good policy to refresh the surface once a year or when required. Typically between 12-36 months depending on: the chosen color, horizontal surface versus vertical surface, local weather and traffic exposure or surface pointing North, East, West or South.

For cleaning use hot water and soap or WOCA Exterior Cleaner mixed with water; which gently cleans the wood while at the same time neutralizes tannins and other natural minerals inside the wood. It opens the wood structure to allow WOCA Exterior Oil to penetrate and saturate the surface ensuring maximum resistance from day one. WOCA Exterior Cleaner is environmentally friendly and can be hosed down without harming vegetation.

Clean the surface with a soft nylon brush or with the WOCA Silicium brush. Hose down the dirty rinsing solution and leave surface to dry for 4-6 hours. After drying the WOCA Exterior Oil is applied as per the application instructions above. **When a regular maintenance regime is conducted, no sanding will be needed between treatments!**
